Mr. Halsey is said to have dissolved the Nonce of the Cathedral in the affair of Central America...

The steamer 'Merrimack,' which was wrecked off the coast of Massachusetts...

And a cold, cold glance back the Lady Moon, And a quizzing glare, so proud and pure, She looked on all below.

She passed on her onward path, To lit to the moon's' s' night, She glided like the lightning's light, Nor the dim and smoken eye.

Through the cemented pane, doth she brightly stream, And over the head she play: As the stars, and stars, and stars, In her cold, white, glist'ry ray.

In the charched dim, when the solemn night, Ev'rappeth the silent dead, She lights up with her light beam Each sacred and profane head.

But she looketh not that are buried there, Earth's brightest and best loved things, Which the lusty heat may yield her, And to which fold memory cling.

Wild tempests roar, or the sailing seas, And the swelling lake is torn, As the iron planks are for a wing, Or the booming billows borne.

Or the scorching flames, with their forked tongues, Blaze up with restless might, And the shriek of anguish ratch out, On the still and startled night.

But clear and calm, and out the rock, Of the storm-cloud force, and wild, She looketh forth on the dreary night, With her smiling, and serene eye.

She gives no heed to the stifled groans, And the sailor's drowning cry; Unmoved she watcheth the ship go down, And tranquilly saith by:

The moon's pain in the sky may rise, And the boiling sea be torn; But with aspect so changeless and serene She looketh on all below.

Oh! a beautiful orb of light is she, When the heart with hope is fluted; And the stern and stern of sterns, When that heart is cold and crushed. (Family Remarks.)

over him, and he pronounces that it was not observed on board in time to render him assistance. He remained six hours, not doing anything, and in sustaining himself, as he thinks, but sometimes three hours before he was picked up.

DEPARTURE OF THE DUKES OF BRUNSWICK. Mr. W. de Bunsow, now Resident-General at Yaguajay, one of the most peculiar facts in aeronautic took place from the gardens of The Royal Proprietor Yaguajay.
